SUMMARY

AI/ML Engineering Graduate with internship experience building production-ready Machine Learning and Generative AI solutions. Experienced in end-to-end ML pipelines, RAG, cloud deployment, and AI automation using Python, PyTorch, TensorFlow, Azure, Docker, and Kubernetes, delivering measurable improvements in model performance and deployment efficiency

EDUCATION

2022 - 2026 B.E - **Computer Science**(Specialization in Artificial Intelligence and Machine Learning)
at **S. A Engineering College** (CGPA: 8.0/10)

WORK EXPERIENCE

Infosys Springboard - AI intern August 2025 - October 2025

- Developed and deployed a cloud-based AI system for Azure capacity planning, improving prediction accuracy to 84.7%
- Architected and validated data pipelines, integrating with Azure DevOps CI/CD pipelines, ensuring data ingestion, processing, and storage, leading to 12% reduction in deployment time
- Enhanced AI model performance through hyperparameter tuning and grid search, reducing overfitting and achieving 19% improvement in F1-score.

Generative AI Research Intern – TekWissen December 2025 - May 2026

- Engineered a Market Reachout Automation System for B2B prospecting using Apollo, ZoomInfo, Crunchbase, Claude, n8n, Instantly, SmartReach.io, Docker, and Kubernetes
- Automated AI-based lead monitoring and personalized outreach, improving output consistency by 15%.
- Deployed a deep learning reply-classification pipeline to route prospects to sales or a RAG bot, reducing manual handling.
- Containerized and orchestrated the system for scalable deployment, cutting error recurrence by 30% and improving processing speed by 13%.

SKILLS

Programming Languages:	Python, SQL, C++, R,Java
Concepts:	Statistical Analysis, Exploratory Data Analysis (EDA), KPI Tracking
Deployment:	Spring Boot, Flask
Databases:	MySQL, MongoDB, ChromaDB
Cloud Tools:	Google Cloud Platform (GCP), Azure, Docker, Kubernetes
ML Libraries:	TensorFlow, PyTorch, Scikit-learn, Open-CV, ML-flow ,HuggingFace, LangChain, Transformers
Data Analytics:	Power BI, Pandas, Seaborn, Matplotlib

PROJECTS

FIFA Player Performance & Economic Analytics

Link: <https://github.com/mahe115/FIFA-Player-Analytics>

- Designed interactive Power BI Football Players dashboards to visualize performance data of 18,000+ football players (2015 to 2024), highlighting key metrics for different player positions.
- Created a detailed visualizations for top 10 player selections and KPIs, Improved player selection accuracy by 25% using KPI-driven dashboards

Azure Demand Forecasting

Link: https://github.com/mahe115/Integrated_Forecasting_Predict_Azure_consumer_demand

- Built an Azure-based consumer demand-forecasting system using time-series models (ARIMA, Light-GBM, LSTM) on historical cloud-consumption data with 80-90% accuracy
- Designed an automated data pipeline and Power BI dashboard to visualize forecast vs actual usage and KPIs, enabling 20–30% faster identification of over-/under-utilized resources

AI Mail Manager for Everyone

Link: <https://github.com/mahe115/AIMailManager>

- Architected and Implemented an AI email management platform using Flask, Streamlit, and OpenAI GPT4, enabling intelligent prioritization, automated response generation, and real-time analytics for 1,000+ monthly emails.
- Implemented advanced features , including contextual responses based on **RAG**, sentiment-aware analysis and search of the knowledge base vector, Decreased the average customer response time by 70%.

Brain Tumor Detection System

Link: https://github.com/mahe115/Brain_Tumour_Detection

- Modeled a Brain Tumor Detection System using PyTorch and Streamlit, achieving 91% accuracy in detecting the four types of brain tumors from MRI scans.
- Optimized a CNN model on a balanced dataset of 44,000 MRI images and Built a user-friendly interface for real-time diagnostics.

ACHIEVEMENTS AND ACCOMPLISHMENTS

- **Secured Runner-Up at Nexus 2024 Project Expo (IEEE Society)** for the Deepfake Detection Project with **achieving 89% accuracy**, recognized for its AI-driven approach to combating digital misinformation.
- **Qualified the TCS National Qualifier Test (NQT)** by clearing Aptitude and Programming assessments, **scoring 84% in Data Structures & Algorithms (DSA)**.
- Engineered 150+ unique algorithmic solutions on LeetCode**, passing over 98% of all provided test cases and resolving complex coding challenges.

CERTIFICATIONS

Advanced R Programming for Data Analytics in Business IIT Kanpur (2024) -[To View](#)
Machine Learning Specialization by DeepLearning.AI - Andrew Ng (2024) -[To View](#)
Deep Learning for Natural Language Processing by IIT-Kharagpur (2025) -[To View](#)
